

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) An adhesive composition comprising an imide (meth)acrylate, a homopolymerizable monomer, and a photoinitiator, and a compound that is copolymerizable with the homopolymerizable monomer, wherein a glass transition temperature of the homopolymerizable monomer is -50 °C or less when it is homopolymerized, and wherein the content of the imide (meth)acrylate is 1 to 20 parts by weight per 100 parts by weight of the homopolymerizable monomer, wherein the content of the compound that is copolymerizable with the homopolymerizable monomer is 1 to 50 parts by weight of a compound per 100 parts by weight of the homopolymerizable monomer, and wherein the compound that is copolymerizable with the homopolymerizable monomer comprises at least one member selected from the group consisting of acrylic acid, isobornyl acrylate, and morpholine acrylate.
2. (Original) The adhesive composition according to claim 1 wherein the imide (meth)acrylate is 2-(perhydrophthalimide-N-yl)ethyl acrylate.
3. (Canceled)
4. (Canceled)

5. (Currently Amended) An adhesive sheet comprising an adhesive layer, wherein the adhesive layer comprises a cured adhesive composition, and wherein the adhesive composition comprises imide (meth)acrylate, and a homopolymerizable polymer, and a photoinitiator, and a compound that is copolymerizable with the homopolymerizable monomer,
wherein a glass transition temperature of the homopolymerizable monomer is -50 °C or less when it is homopolymerized, and
wherein the content of the imide (meth)acrylate is 1 to 20 parts by weight per 100 parts by weight of the homopolymerizable monomer,
wherein the content of the compound that is copolymerizable with the homopolymerizable monomer is 1 to 50 parts by weight of a compound per 100 parts by weight of the homopolymerizable monomer, and
wherein the compound that is copolymerizable with the homopolymerizable monomer comprises at least one member selected from the group consisting of acrylic acid, isobornyl acrylate, and morpholine acrylate.
6. (Original) An adhesive sheet according to claim 5 further comprising a base sheet, wherein the adhesive layer is formed on the base sheet.
7. (Currently Amended) An adhesive sheet according to claim 5 wherein the tackiness adhesive sheet is shaped as a film-shape.
